Monitoring Implementation

- Administration is monitoring the implementation and outcomes of Rezoning for Housing (21P2024)
- It is typical to identify the need for housekeeping amendments after significant rezonings or bylaw changes
- Some developments now require development permits, where only building permits were required previously
- The proposed amendments would return to only requiring building permits

Recommendations

That Council:

Give three readings to **Proposed Bylaw 78P2024** for the amendments to the Land Use Bylaw 1P2007 as outlined in Attachment 2.
