Proposed Electric Vehicle (EV) Charger:

- Dimensions: 2.65 x 1.16 x 0.47 metres

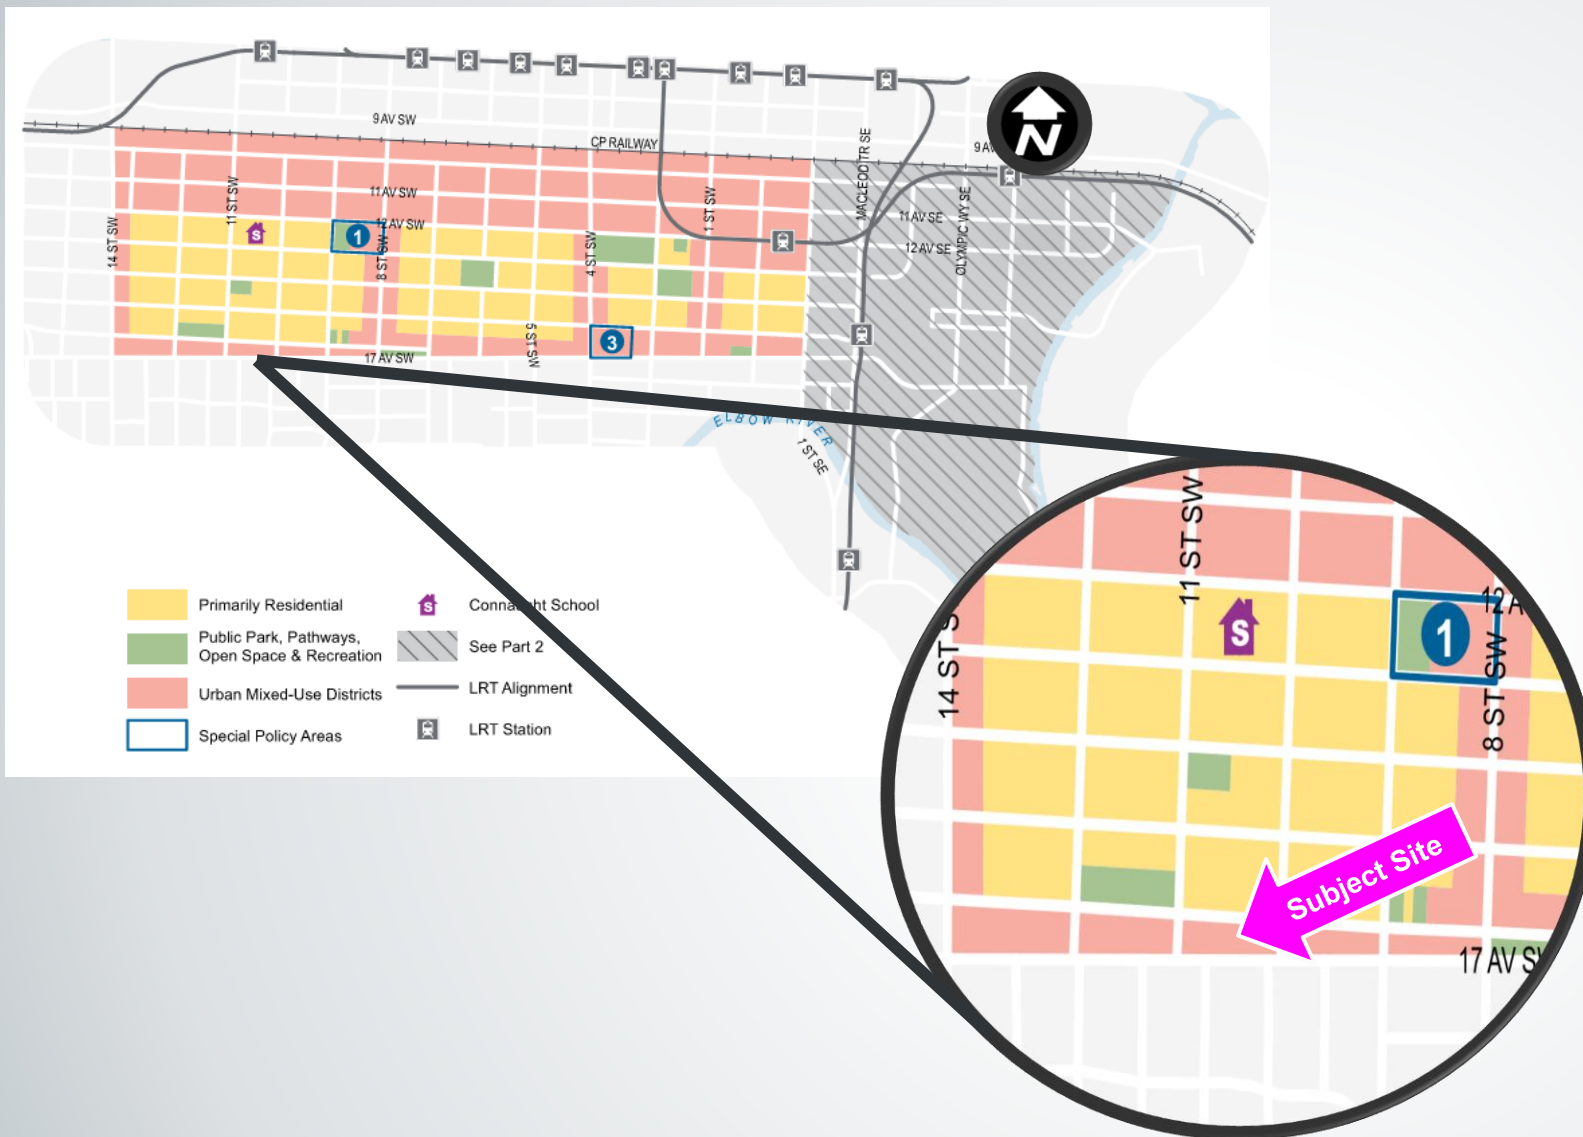

Beltline Area Redevelopment Plan

Map 3: Land Use Concept

- Located in an Urban Mixed-Use District.
- Supports vibrant, pedestrian streets that are visually interesting and sensitive to nearby residential uses.

Purpose:

- Allow for an additional discretionary use of a Digital Sign with Electric Vehicle Charging Facility.

Highlights from the DC Bylaw Rules:

- 15.0 metre separation from existing freestanding, third party and other digital signs on site.
- 300.0 metre separation from any other similar, digital signs and 75.0 metres from any other third-party advertising signs.
- Minimum 1.5 metre setback from any property line shared with a street.
- Must not operate or only display a black screen between 11 p.m. and 6 a.m.
- Temporary 3-year development permit approval with option to renew.
- Would allow advertisement of businesses on or off-site.

Defined Uses

4 In this Direct Control District:

(a) “**Digital Sign with Electric Vehicle Charging Facility**” means a structure:

(i) that includes a **Sign – Class G** that:

(A) displays **copy** directing attention to a business, commodity, service or entertainment that is conducted, sold or offered on or off-site;

(B) must not exceed a height of 2.7 metres from **grade** when measured adjacent to the structure;

(C) includes a maximum of one **sign** on the parcel, which may be double-faced;

(D) has **copy area** facing each direction that must not exceed 1.6 square metres; and

(i) where electric vehicles are supplied with electricity for the purpose of charging.

Intent

- Promote community aesthetics and public safety.
- Prevent visual clutter from sign proliferation.
- Protect Calgary's communities and visual environment.

Supporting Principles

(A) I. The appropriate location is generally commercial, along Arterial Streets and Urban Boulevards.

Review: The site is commercial and fronts a Neighbourhood Main Street (17 Ave. SW), which is similar to an Urban Blvd.

(A) IV. Must be pedestrian-oriented, protect quality residential environment and consider competition with on-site businesses.

Review: The proposed sign structure is pedestrian-scaled, development permit conditions will manage visual impacts.

The sign could include advertising of on-site businesses, and its size limits its competition with existing on-site signage.

(A) V. Maintain the visual amenity of roads adjacent to or passing through residential communities.

Review: The orientation of the sign reduces visibility from nearby residential and the location will be reviewed through the development permit application process.

(B) I. The orientation, distance and location should minimize visual intrusion to residences, parks and natural areas

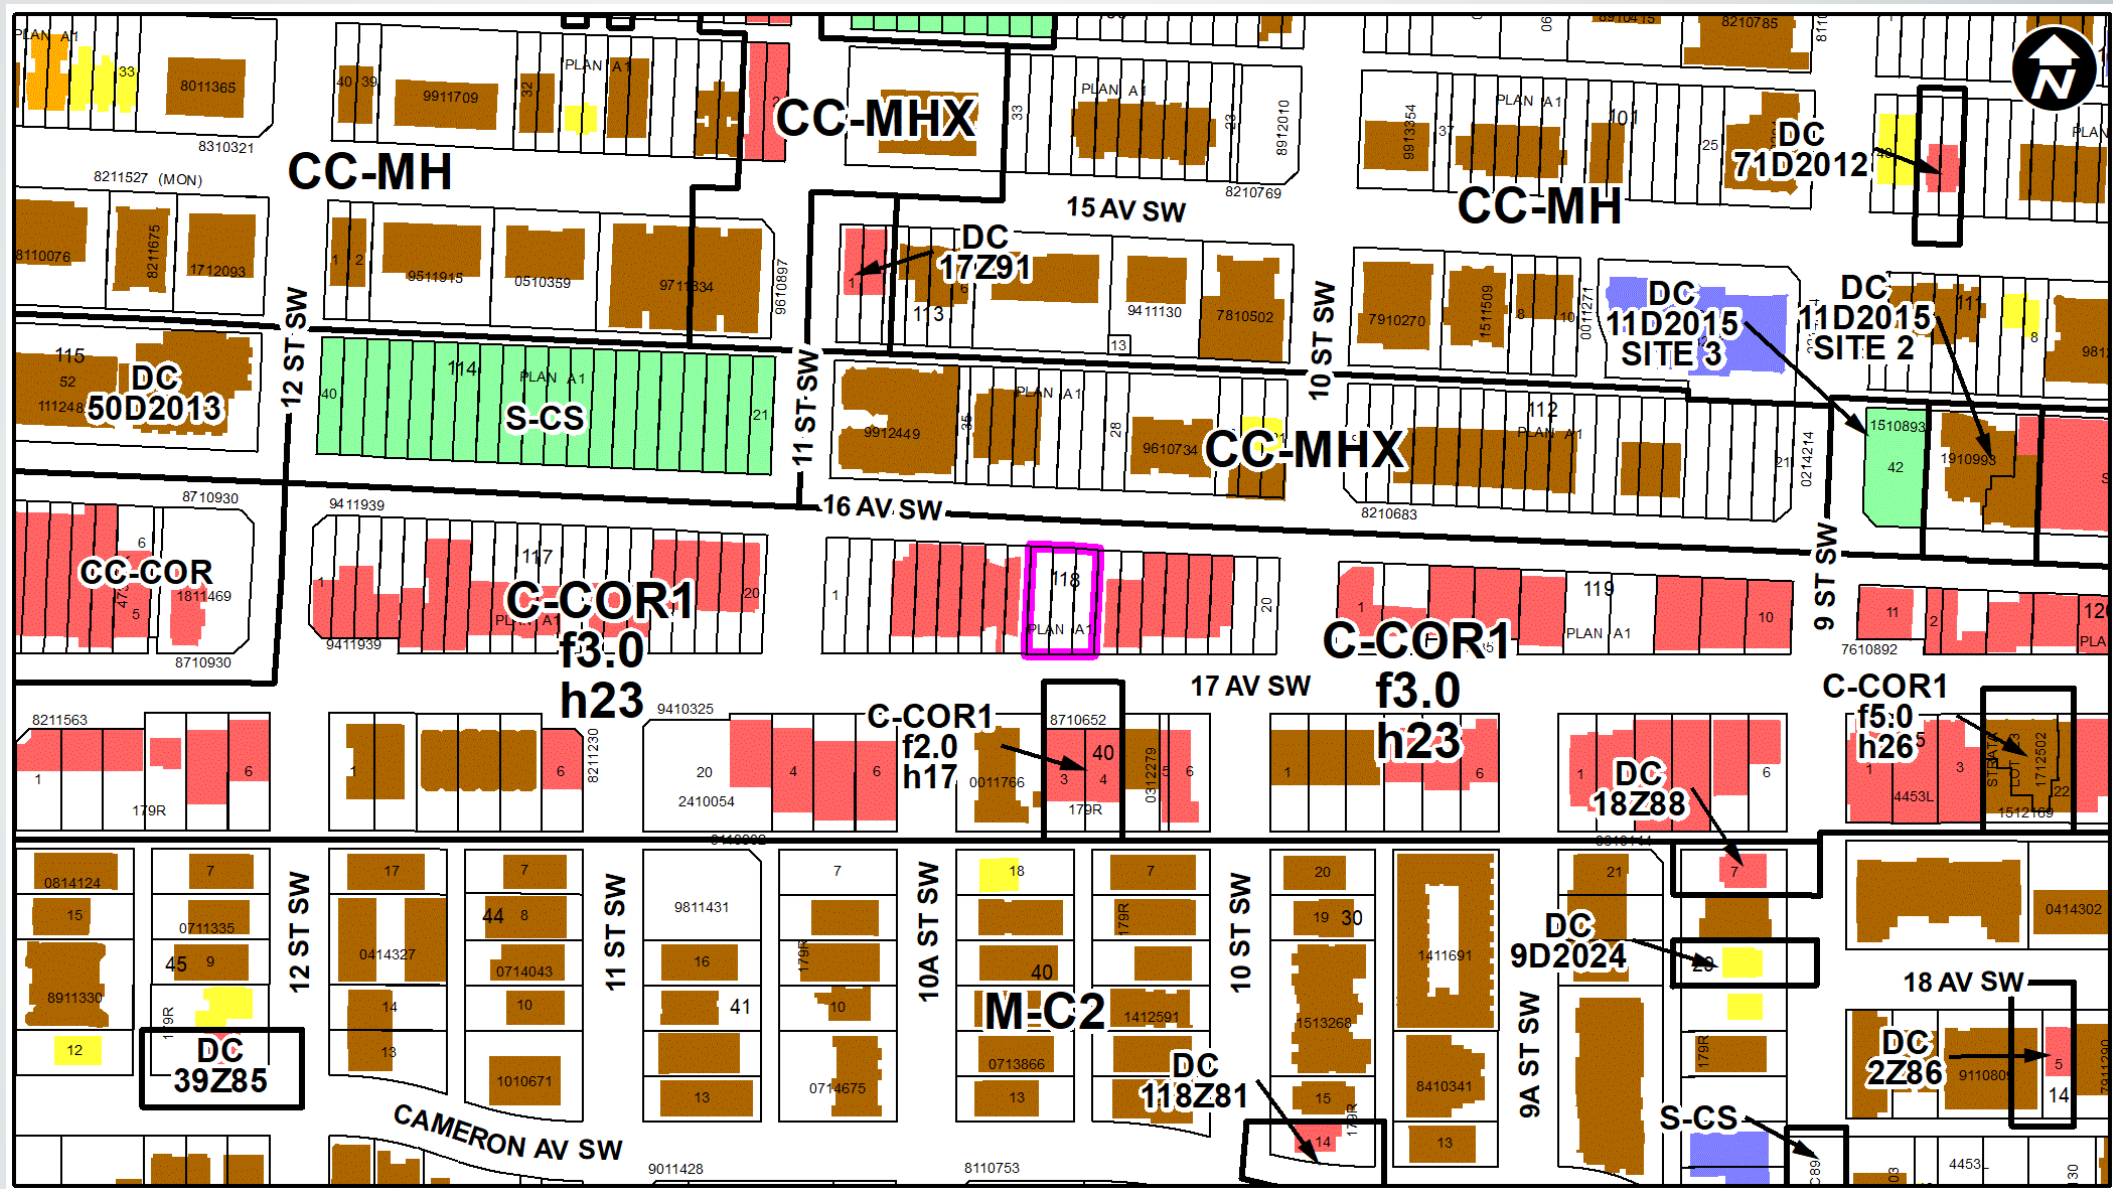

Review: The orientation of the sign may reduce visibility from residences and the site location will be reviewed through the development permit application process.

(C) VI. Pedestal type signs are suitable where commercial development is on both sides of the street

Review: The scale and orientation of the sign fits well within the context and character of the area.
