

Update to the Action Plan to Minimize Impacts of Waste and Recycling Sites

Infrastructure and Planning committee – CD2024-1315

2024 December 19

That the Community Development Committee recommends that Council receive this report for the Corporate Record.

- The waste officer role has been permanently filled
- The interdepartmental working group has been formed
- Land use Bylaw updates were made in 2023
- Coordinated inspections and enforcement have been successful in addressing historically non-compliant sites
- Removed 23,000 tonnes of waste material from sites

Review of Business Licence Bylaw Changes

- No additional enforcement tools needed at this time
- Would require operational changes for all waste and recycling sites (including compliant sites)
- Relying on Land use Bylaw and Fire Code is effective

Ongoing Actions and Next Steps

- Continued advocacy efforts with Government of Alberta
- Ongoing communication with site operators to ensure compliance
- Ongoing inspections and enforcement activities at private waste sites
- Development of a guide for waste and recycling site operators

That the Community Development Committee recommends that Council receive this report for the Corporate Record.
