

Applicant Outreach Summary

Nostalgia S-R Direct Control Land Use Amendment LOC2025-0049

We undertook outreach as part of the original application (LOC2023-0207) which was approved in September 2024. The Subject Site was always depicted as an S-R use and this is a minor amendment that maintains the intent of what was shown previously. Based on previous engagement, and the community outreach assessment tool, there is nothing indicating that outreach is required outside of the standard notice posting which was completed in March 2025. We have made ourselves available to answer any questions with nothing received to date, at the time of this report.
