Economic

Financial and economic market conditions impact both investment income earned, as well as the market valuation of The City's investment portfolios.

Service and Financial Implications

Other:

Investment Income earned is part of the budgeted amounts for General Revenues as well the projected balances for reserves and business units that have funds being invested. Investment income can help offset cost escalations for projects and other developments thus reducing possibility of project funding shortfalls. A shortfall of investment income could increase the burden on taxpayers, while a surplus could reduce that burden.

RISK

The City of Calgary mitigates risk within its investment portfolios through a sound governance structure, adherence to government regulations, and The City's Investment Policy. Investment managers retained by The City, manage risk by investing in quality investments and ensuring sufficient diversification among holdings in their portfolios. The Investment Advisory Committee oversees investment strategy and regularly reviews the investment activity, compliance, and risk mitigation practices of both internal and external managers to meet City's investment objectives. Prudent investment in companies and governments that follow environmental and social principles supports sustainable risk/return performance of City investments to meet City goals and objectives.
