

Applicant Submission

2025 April 14

As part of city's blanket rezoning process, this lot is already zoned as R-CG. However under the current Millican-Ogden ARP, the subject site is identified with a "low density conservation" designation, which would only allow for single and semi-detached dwellings. The proposed DP application DP2025-01922 proposed for 4 units row house with basement suites. In order to accommodate the proposed, we have to change the designation to "low or medium density multi-dwelling residential" with revised minimum density factor from 44 units per hectare to 75 to align with R-CG

The subject parcel is located within the Residential-Developed-Inner City area of the Municipal Development Plan. The applicable policies encourage redevelopment of inner-city communities that is similar in scale and built form to existing development, including a mix of housing such as townhouses and row housing. The Municipal Development Plan also calls for a modest intensification of the inner city, an area serviced by existing infrastructure, public amenities and transit. The proposal is in keeping with the relevant policies of the MDP.

Housing diversity and choice policies encourage the provision of a wide range of housing types, tenures and densities that may meet affordability, accessibility, life cycle and lifestyle needs of different groups; an adaptation of the City's existing housing stock to enable changing households to remain in the same neighbourhood for longer time periods through allowing accessory suites in low density areas. So we sincerely hope city can support our application.
