

Background and Previous Council Direction

This attachment provides a summary of the background and previous Council direction related to the Growth Application considered in this report, as well as new community growth decision-making in general.

Background

Growth Applications serve as the mechanism for evaluating new community growth opportunities in Calgary. The Growth Application process was endorsed by Council in 2023 July 25 ([IP2023-0559](#)), and involves assessment of alignment with City policy including proximity to amenities and services, market demand and supply, and finances and infrastructure.

Growth Applications use a responsive application-based model, with final decisions on capital investments made through the Business Plans and Budgets process. Growth Applications that only require operating investment to enable development may be approved outside the Business Plans and Budgets process. Semi-annual briefing notes on Growth Application development activity and cumulative investment are also provided to Infrastructure and Planning Committee.

The record of Council decisions on other individual Growth Applications can be found through the semi-annual briefing notes and Council minutes.
