

Planning & Development Policy Prioritization Strategy Schematic

NOTES:

Priority Themes: These are aligned with Council's priorities and should be reviewed by Planning & Development on a periodic basis of approximately 1 to 4 years to confirm that they still address the policy objectives that are most relevant to the situation.

Program Streams: The two streams are designed to provide a balanced focus of policy initiatives between growth-enabling work at the citywide and community level and strategic issues. For this reason, they should remain constant even when the Priority Themes are changed. The individual projects within each Program Stream, however, should be regularly reviewed, i.e. when resources become available.

Planning and Policy Service Improvements: Although not a discreet priority theme, this objective will be continuously pursued by Administration.
