

What Do We Need for Decision-Making

1. Set criteria for which business cases move forward – completed by April 30 to allow for presentation of selected business cases to Council by June;
2. Establish what services are needed for each business case, and staging of those services;
3. Shared model of capital cost with new financing tools (who pays for what, and how); and
4. Developer offset of operating costs (where needed) until established critical mass is reached.
