

that they allow to use the back field as a toilet and do not pick up his feces. They frequently allow him outside off-leash and sometimes completely unaccompanied. I have spoken to them about the law that says he needs to be on a leash and we have also asked them to use dog bags for their dog's feces. We also find his poop in our backyard at times as there is no fence. I have found the dog on 3 occasions outside of their home without their knowledge and frightening other people walking their dogs as their dog is a large boxer. The neighbors did not even know that he was outside alone. The animal is harmless but looks frightening. They do not respond to suggestions about picking up the dog's poop or having him on a leash which makes us concerned about future tenants and any issues with them. 10) In their initial application, these homeowners indicated they want the suite to generate additional revenue for their household. Their need/desire for additional income does not supersede our right to have our property value protected. If they are in need of additional income, then it is obvious that they cannot afford to live in this house. There are 4 adults living in the home and 3 or 4 of them work. They could consider moving to a more affordable neighborhood where this type of basement suites is already allowed by local zoning. 11) The initial application also said that they had spoken with the neighbors about their proposal and this is definitely not true for us or the neighbors at 409 and 413 as we have spoken and none of us were aware of their intentions to apply for re-zoning. This application has not been honestly presented to the city as something that neighbors were aware of, or supportive of. We will be providing photos as well but the files are too big to upload so I will bring a written copy to City Hall.
