CANNABIS STORE GUIDELINES

Objectives

- To ensure opportunities for Cannabis Stores on main streets and in communities are balanced with opportunities for other types of commercial uses. A variety of commercial uses provide communities with options, supports economic diversification and helps build a complete retail street.
- 2. To promote a full range and a mix of commercial uses and opportunities along main streets and in communities.
- 3. To avoid the potential for negative perceptions that may be created about a community when there is an over concentration or clustering of Cannabis Stores along a main street or in a community.
- 4. To ensure Cannabis Stores are not located too close to public and private schools in order to limit convenient access and lower the profile and visibility of cannabis to young persons.
- 5. To manage the potential socio-economic impacts of the clustering and concentration of Cannabis Stores.

Guidelines

Separation Distance Between Cannabis Stores

The Development Authority must consider the overall number and density of Cannabis Stores on a main street, community or other area in comparison to other main streets, communities or areas in Calgary when considering a request for a reduction to the minimum separation distance between Cannabis Stores.

There should not be a significant long-term difference in the concentration of Cannabis Stores between different main streets, communities or other areas. Recognizing that every location has unique characteristics (e.g. schools and other factors that affect a Cannabis Store location), generally a significant long-term difference would be characterized by more than a 25 per cent difference in the concentration of Cannabis Stores per unit population.

Additionally, the development authority may consider a reduction in the separation distance between Cannabis Stores when:

- 1. There is only one other Cannabis Store within the minimum separation distance;
- 2. A proposed Cannabis Store is located on a different street or on the opposite side of the same street as the existing Cannabis Store;
- 3. A major road, expressway or river separates the proposed Cannabis Store from the existing Cannabis Store;
- 4. The proposed Cannabis Store is located in an enclosed shopping centre; or

5. An existing approved Cannabis Store proposes to relocate to a new location within 300 metres of its original location, provided that it does not move within the separation distance of a different Cannabis Store.

Separation distance to a school or an Emergency Shelter

The Development Authority may consider a minor reduction in the separation distance between a proposed Cannabis Store and a parcel that contains an Emergency Shelter or public or private school. If the depth of the average setback area from the property line of a parcel containing the Emergency Shelter or school building is more than or equal to the proposed relaxation it may be reduced that amount up to a maximum of 15 metres.

Separation distance to a vacant municipal and school reserve or school reserve parcel

The Development Authority may consider issuing a time-limited Development Permit for a Cannabis Store when considering a reduction in the separation distance between a Cannabis Store and a vacant municipal and school reserve or school reserve parcel.

Location near a Child Care Service

The development authority should not approve a Cannabis Store within 10 metres of a Child Care Service.
