		Protective Services									
I-8	P8	Community Services & Protective Services	Parks	Bowness Park Lagoon Inlet Structure Protection - The 2013 flood caused significant damage to the lagoon inlet structure. During the course of completing the repairs to the structure gabion mattresses were installed to provide additional protection to the inlet.	The gabion mattresses should protect the inlet structure from future damage due to flood or high water, reducing or eliminating future costs related to flood repairs.	932	90			Under 6 months	2014
I-9	P10	Community Services & Protective Services	Parks	Bowness Park - Washrooms and Facilities • 2 Seasonal and 1 Year-round washrooms – mechanical put	Relocation of electrical or mechanical components above or out of areas susceptible to flood damage will protect them from damage due to future flood events. Resilient	932	500			Under 6 months	2014

NOTE: Provincial Mitigation/Resiliency Program funding to be requested for Infrastructure/Organization projects that are shared

				on roof of all washrooms, originally on ground level. Went from tile to acrylic flooring on all washrooms	flooring will be resistant to future flood damage.						
I-10	P11	Community Services & Protective Services	Parks	Prince's Island - During the 2013 flood the causeway was completely destroyed. The causeway was also completely destroyed after the 2005 event. In order to increase the resilience of the causeway additional concrete and rip rap was incorporated into the structure. Final landscaping will be completed in the	After the 2005 event the shallow and deep utilities that run through the causeway were relocated below the anticipated depth of future erosion due to flooding. This resilience measure proved to be successful. The current resilience measures are designed to provide protection from further flood damage and will reduce The City's exposure to future flood related repair costs and if faced with a similar event, will maintain a critical connection to the Island for emergency responders.	932	100			Under 6 months	2014

				spring of 2014.							
I-11	P12	Community Services & Protective Services	Parks	Beaver Dam Flats - During the June 2013 flood event, high water levels within Beaverdam Flats eroded and washed out a significant portion of the regional pathway and causeway.	The intent of the restoration work is to not only re-establish the functionality of the pathway and causeway, but to add resiliency to the structures for future high water events. If effective future flood related will be reduced or eliminated.	932	70			Under 6 months	2014
I-12	P15	Community Services & Protective Services	Parks	Griffith Woods Park Washrooms - Raised mechanical above flood line and flooring upgraded from tile to acrylic. Mechanical upgrades \$15,000.00 Flooring upgrades \$7,000.00	Relocation of electrical or mechanical components above or out of areas susceptible to flood damage will protect them from damage due to future flood events. Further flooring resilient to flood waters was installed.	932	20			Under 6 months	2014

				from critical building systems and into surge tanks (tunnel) or other holding basins.	containment areas.						
I-28		Corporate Services	Corporate Properties & Buildings	Remove the water in the holding basins at a rate that matches or exceeds the flow rate of water entering the building and accumulating in the holding basins.	Water must be removed from holding basins to ensure capacity remains for additional water containment.	937	350	694	50	Under 6 months	2014
I-29		Corporate Services	Corporate Properties & Buildings	Relocate electrical switch that distributes emergency generator to a physical point above any high water mark.	This action will eliminate the need to declare a building uninhabitable. It will not restore the facility to 'fit for purpose', however it will speed any repair process and reduce risks to any persons in the building.	937	600	694	18	Under 6 months	2014

I-30		Corporate Services	Corporate Properties & Buildings	Establish two administrative workplace hubs in both north and south sectors of Calgary.	Enable continuity of City service delivery to citizens and employee productivity.	937	900	694	10	Under 6 months	2014
I-31		Corporate Services	Corporate Properties & Buildings	Update CPB CAD drawings to digitize, maintain and store so that they are available to stakeholders.	This action will enable timely and accurate access to building drawings. It will speed recovery and repair efforts and enable operator knowledge and access of building systems and location information.	937	700	694	10	Under 6 months	2014
I-32		Corporate Services	Corporate Properties & Buildings	Develop a CPB Emergency and Continuity Management Plan	Development and maintenance of this E&CM Plan will ensure that critical services within CPB are maintained before, during, and after a crisis, major emergency, or disaster.	937	10	694	150	Under 6 months	2014
I-33		Corporate Services	Corporate Properties & Buildings	Create an Emergency Service Counter plan and response	This initiative will ensure critical citizen-facing corporate services are available outside of the downtown core after an interruption of normal service within the downtown core or	937	600	694	10	Under 6 months	2014
