

Council Priorities	Examples of Areas of Strategic Discussion for the City
A prosperous city	What gains can we make from current state and best practice review and updates of TBL decision making processes?
	What is available for the creation, expansion of existing and future business development programs with Partners (both formal and informal)?
	What tracking and monitoring do we want to do related to usage and returns on sport infrastructure, culture, community development?
	The City's role in driving Calgary as an innovative, sustainable and resilient city?
	What can we learn about the City's roles and responsibilities in hosting, the impact on City budgets, borrowing capacity and other financial impacts for potential future major events?
A city of inspiring neighbourhoods	What do we want to consider or run in parallel with regard to developing, implementing planned activities or expanding our own culture and sport programming?
	What community initiatives would we consider in addition to the BidCo work?
	How do we drive further Diversity and Inclusion gains for Calgary beyond what is proposed?
	How can the City expand its role as an innovative and resilient city?
	How can we respect our history, while growing our communities to better reflect all of our residents including Indigenous persons, Newcomers to Calgary and Persons with Disabilities?
A city that moves	What additional gains can we make in relation to regional transit using this opportunity as a trigger?
	How can we use this experience to forwarding work and goals within the Calgary Transportation Plan?
	How do we use this experience to incite behaviours changes around transit, environmentally sustainable transportation options for Calgarians?
	Are there initiatives within the BidCo in relation to transportation we would like to expand upon?
A healthy and green city	What do we want to do for fitness and recreation programming activities in alignment?
	How can we increase our efforts to meet diversion targets we currently have?
	How can we increase efforts to reduce water, wastewater and storm water impacts and meet current and future targets?
	What sort of community development activities, festivals, events, long term programs for neighbourhoods do we want to consider?
	What activities and projects can we take on to improve our watershed impacts?
A well-run city	What items of business performance efficiency and effectiveness and innovation best practices can we use, learn from or contribute to as part of the ongoing discussions?

	• Do we have learning around transparency around decision making which should be considered?
	• How has this discussion broken down our current lines of services to achieve a broad discussion around outcomes for Calgarians?
	• What opportunities have we seen come forward for increased collaboration and connection outside the City?

For Discussion
