Calgary - Connected & Creative

13

Calgary

We **embrace** experimentation.

2017

Calgary - Connected & Creative

14

We are **leaders** of **future** local government.

2017 Calgary - Connected & Creative 16

What **more** can we do?

- Prepare for even more citizen engagement and direct democracy
- Just-in-time government customized to individual experiences
- Mindfully design our systems and processes to adapt
- Continue to invest in our digital infrastructure
- Encourage more city-to-city and regional collaboration

What is smart cities? What does it mean? A Smart City is a city that uses technology to improve the quality of life for its citizens.

Smart Cities Challenge - Get Ready!

SMART CITIES CHALLENGE

Welcome to Canada's Smart Cities Challenge

Canada's Smart Cities Challenge is seeking smart ideas to improve the quality of life for its citizens. A smart city uses technology and data to improve the quality of life for its citizens. Smart cities have the potential to improve every aspect of community life - from how we move around, how we live and play, how we work and learn, how we interact and are supported in society, how they interact with the natural environment, and how they create value and secure public spaces.

In the lead-up to the launch of Smart Cities Challenge, people across the country are invited to make part in a conversation: What is the top priority for improving your city, town or community? How can smart technology and practices create real impact?

The Smart Cities Challenge will allow municipalities, regional governments, and Indigenous communities to bring their ideas forward, and the best ones will win!

Prizes

WINNERS OF THE CHALLENGE WILL RECEIVE:

- A \$100,000 cash prize
- A \$100,000 cash prize for the runner-up
- A \$100,000 cash prize for the third-place winner
