Information Technology Challenges and Opportunities

2018 October 24

AC2018-1210 Attachment 1

The Role of Technology in Municipalities is Evolving

“Tech is no longer an industry, it is a strategic piece of every industry. We are all technology companies now.”

-Alan Murray, Editor of Fortune Magazine (2017)

IT is here...

...and IT is here, too

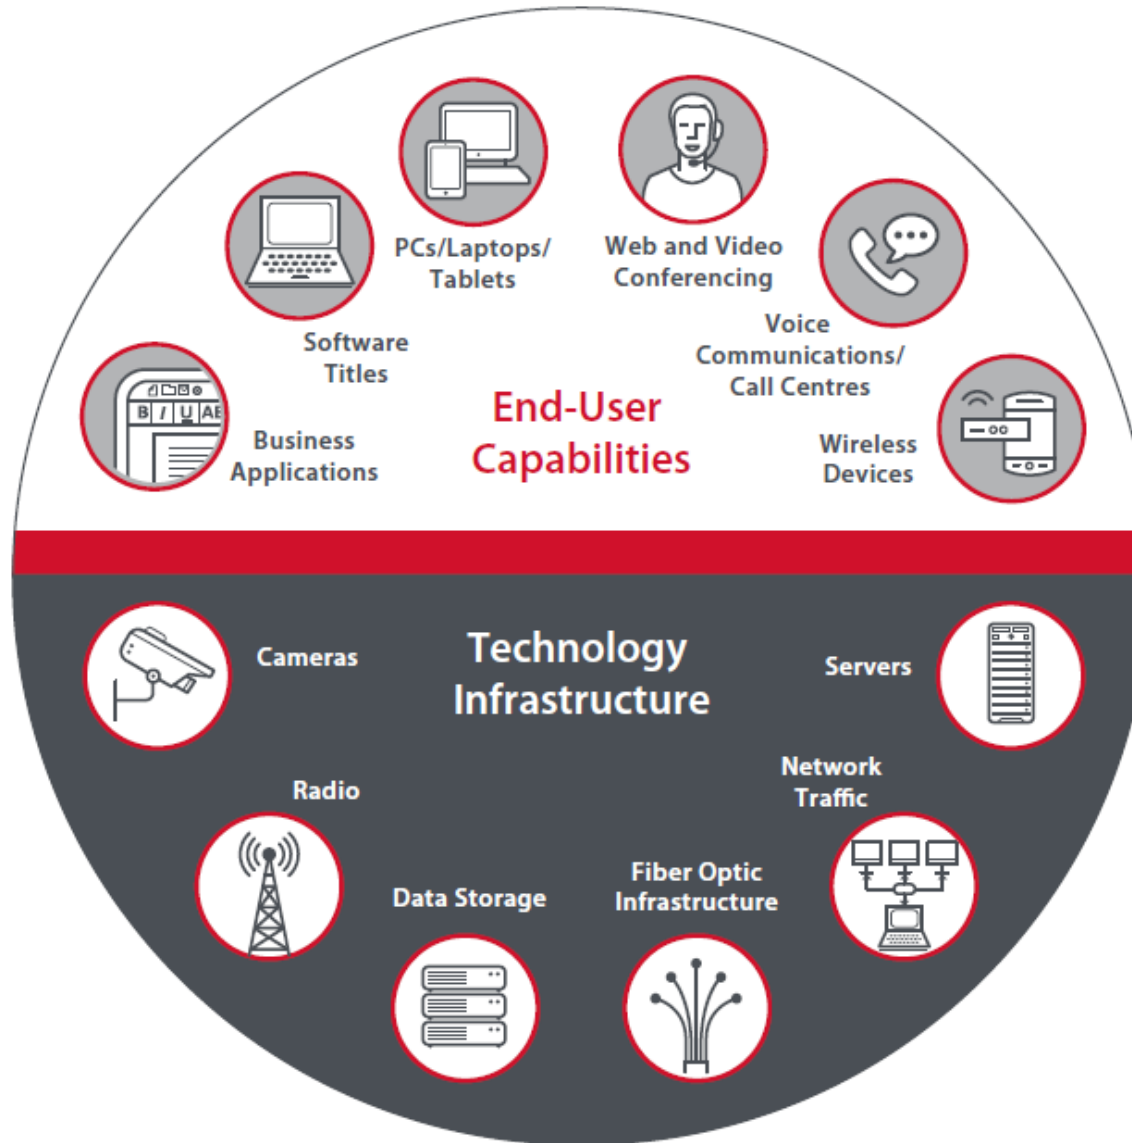

“Technology will be embedded in everything in the digital business of the future.”
-David Cearley, Vice-President, Gartner (2017)

IT is a Strategic Partner

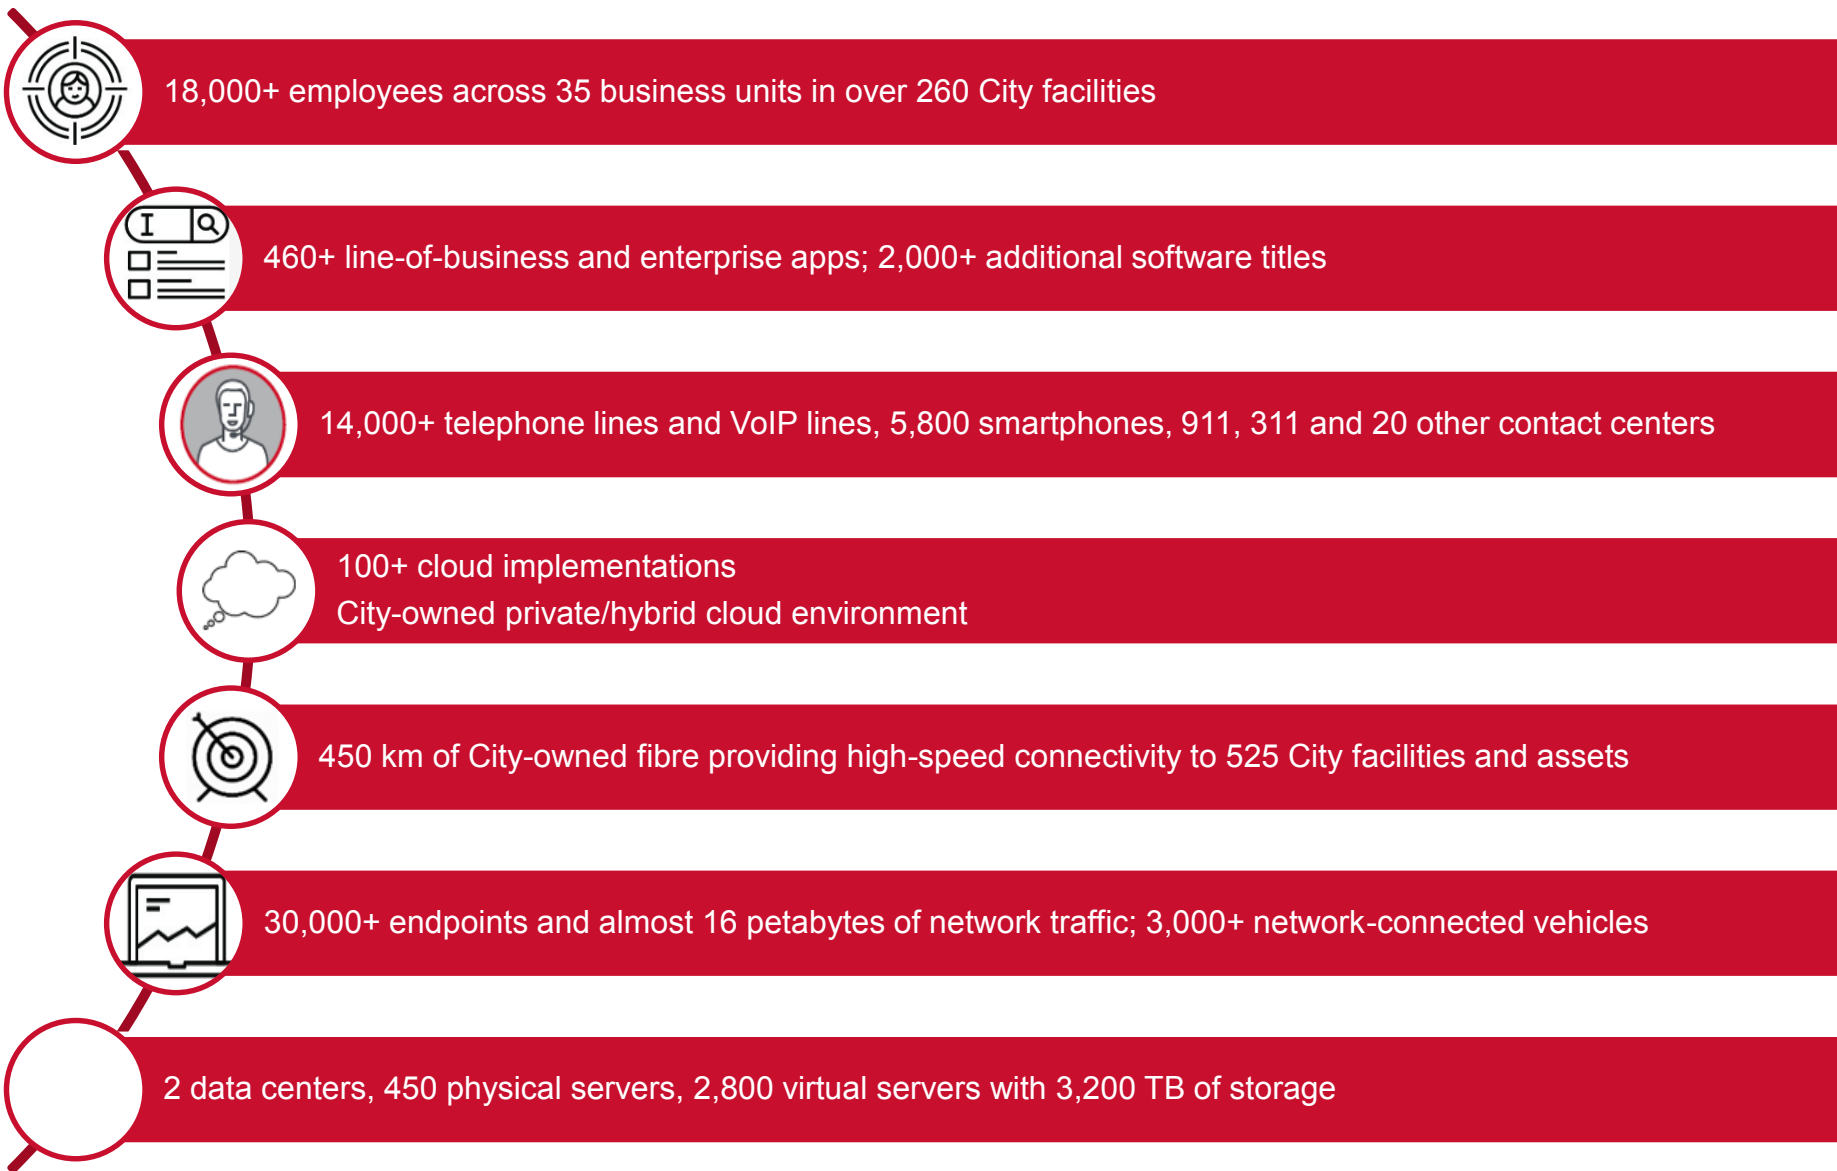

City Technology Landscape

City Business Units Rely on Technology

Citizens Demand Technology Services

375,000 myID citizen accounts and 7,000 myID business accounts

281 citizen-facing transactions can be completed online or with a mobile device

Public Wi-Fi: 22+ million connections per year. Offered at 80 City locations

54% of Calgarians prefer to conduct business with The City by internet

61% of website visits to Calgary.ca are through a mobile device

21 million visits to Calgary.ca. Citizens seeking self-serve transactions make up nearly 50% of these visits

Corporate ZBR: Shared Challenges of Internal Services

Software: Perpetual (Buy) vs. Subscription (Lease)

Software Costs: Why are they Increasing?

I. Shift to Subscription-Based Software

- We are in transition from the “buy” model to the “lease” model and will have both models for some time yet
- Over the longer term, subscriptions have a higher Total Cost of Ownership

II. Increased Demand

- Impacts to back-end infrastructure
 - Database licenses, management tools, extended support agreements
- Compliance and Resiliency Requirements
 - Secure access, remote/mobile access, business continuity
- New services and new maintenance charges
 - Integration, analytics, maintenance charges for software

III. Price Increases

- Inflation
- US Dollar Exchange Rate

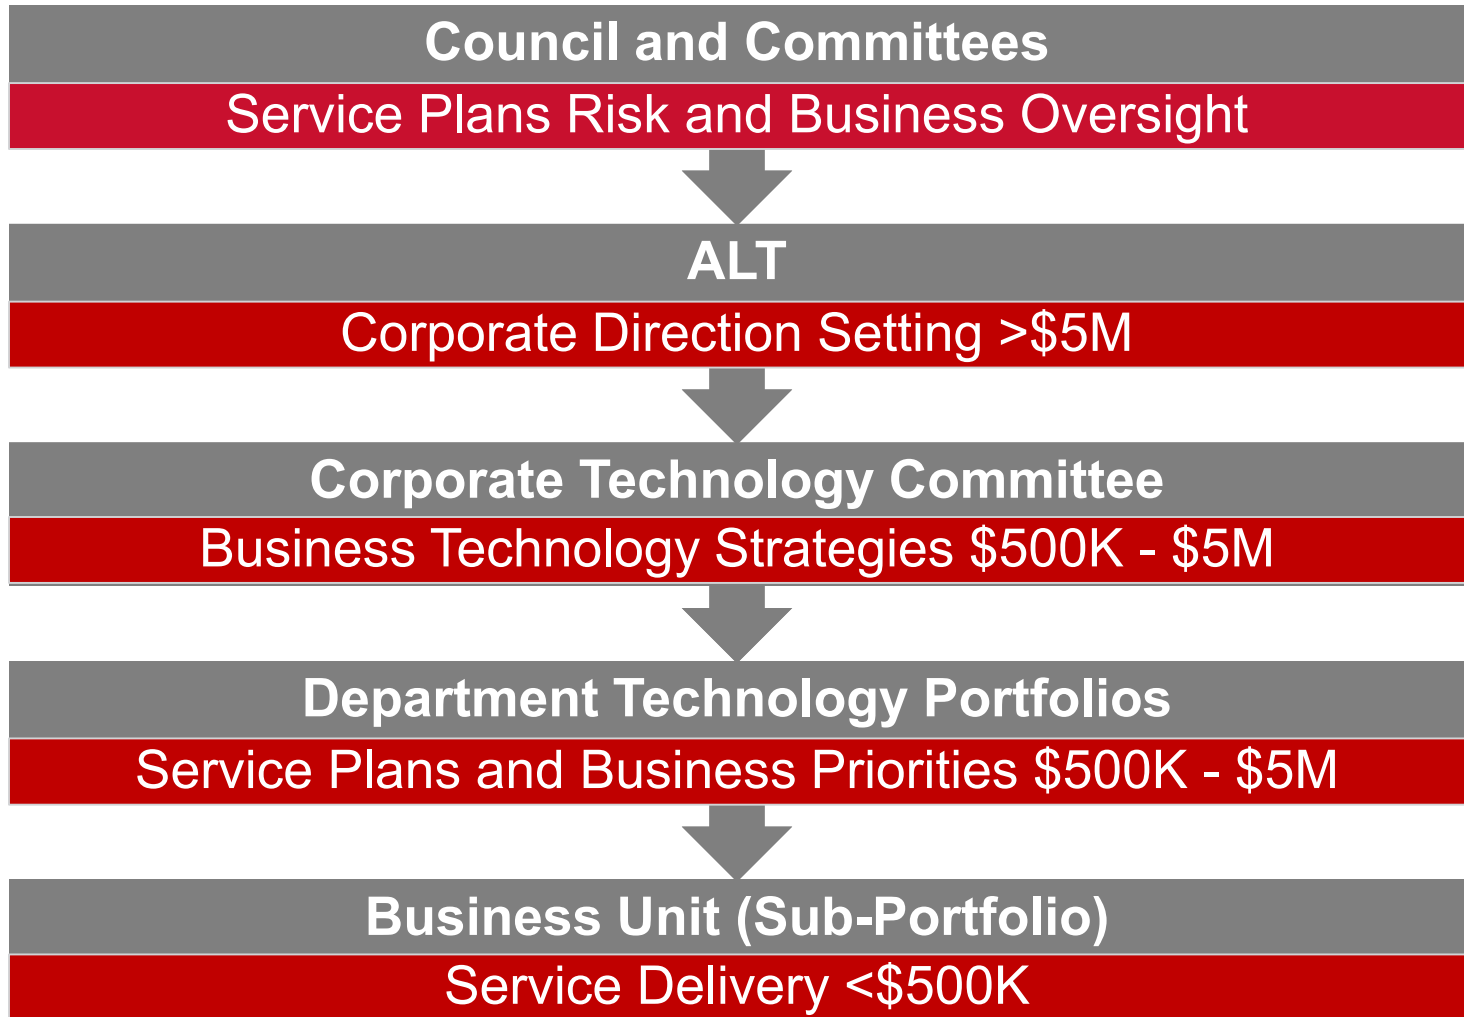

Software Costs: Mitigation Strategies

- I. Use Better Tools to Manage Software
- II. Usage Monitoring and Fit for Purpose
 - Ensuring titles are really needed and are being used
 - Joint effort between IT and other Business Units
- III. Application Portfolio Management - ZBR
- IV. Always looking for lower cost alternatives
wherever possible

Software – Operating Expenditures Actuals and Projections (2018-2022)

Corporate Technology Plan

The Enterprise Platform Portal showcases the strategies and capabilities of the various technologies available to business units. The tools below will help you develop and understand the technology at your disposal.

Enterprise Platform

An interactive diagram showing relationships between Business context, Enterprise capabilities, and Enterprise applications and functions.

Enterprise Applications Roadmap

An interactive diagram showing planned or in-progress Enterprise Application Initiatives on a timeline.
