Madeleine Krizan
City Planning Department
City of Calgary
Calgary, Alberta

Dear Ms. Krizan,

Project 2000258 6 Street and 20 Avenue NW

A recent petition to the City of Calgary for parking solutions signed by parishioners and neighbours indicate many are concerned with availability of parking. There will be less parking with the proposed affordable housing project. If four or five stalls on 6 Street in front of the development between the alley and 20 Avenue are used, it will impact valuable parking for the church.

There is limited parking on 19 Avenue between 6 Street and 5 Street with visitors or occupants using available parking. Also 6 Street on the west side is not available for parking, and there is permitted parking between 6 and 7 Street on 19 Avenue. Our parking lot is often filled weekdays and totally packed on weekends. People visiting the green space with their pets often park on the church parking lot reducing spaces available. In the past they parked on the space proposed for affordable housing.

Some families have more than one vehicle so parking goes quickly on 6 Street and also 19 Avenue. More people are not able to walk distances even if it appears they are young enough to walk and park a few blocks away. At Easter and Christmas people are parking blocks away which can be stressful. In 1912 when the church was constructed families lived in the area and were able to walk. Now they travel from all parts of the city and drive.

There is more and more development in the area with many multi dwellings. This brings more traffic and with a high building proposed built to the corner, visibility is difficult from the east. More people are driving on 6 Street at a high speed, therefore a traffic light could be required on 20 Avenue.

We thank you for your consideration in this serious problem of parking and ask for your support in a positive outcome for everyone.

Sincerely,

Fr. Jaroslaw Dziuba,
Pastor St. Joseph Parish

Cc Druh Farrell, Ward 7
Blair, Ward 9, Alderman's Office

St. Joseph Church Parking Constraint Petition

We, the parishioners in conjunction with neighbouring community members are petitioning the City of Calgary to actively pursue effective solutions to the parking constraints that surround St. Joseph Church, located at 640 - 19 Ave NW Calgary T2M 0Y8. We are constrained with the lack of adjacent street parking due to the rapid development of multi-family dwellings, the proposed affordable housing project to the north of the church and the residential parking permits. One immediate solution that we are seeking would be to relax the current residential parking permits to allow parking on Saturday and Sunday which are our busiest times requiring parking beyond the capacity in our parking lot.

St. Joseph Church Parking Constraint Petition

We, the parishioners in conjunction with neighbouring community members are petitioning the City of Calgary to actively pursue effective solutions to the parking constraints that surround St. Joseph Church, located at 640 - 19 Ave NW Calgary T2M 0Y8. We are constrained with the lack of adjacent street parking due to the rapid development of multi-family dwellings, the proposed affordable housing project to the north of the church and the residential parking permits. One immediate solution that we are seeking would be to relax the current residential parking permits to allow parking on Saturday and Sunday which are our busiest times requiring parking beyond the capacity in our parking lot.

St. Joseph Church Parking Constraint Petition

We, the parishioners in conjunction with neighbouring community members are petitioning the City of Calgary to actively pursue effective solutions to the parking constraints that surround St. Joseph Church, located at 640 - 19 Ave NW Calgary T2M 0Y8. We are constrained with the lack of adjacent street parking due to the rapid development of multi-family dwellings, the proposed affordable housing project to the north of the church and the residential parking permits. One immediate solution that we are seeking would be to relax the current residential parking permits to allow parking on Saturday and Sunday which are our busiest times requiring parking beyond the capacity in our parking lot.
